

The Ontario Environment and Cleantech Business and Policy Forum

Investment. Policy. Growth.

Wednesday April 23, 2014

Marriott Eaton Centre Hotel, 525 Bay St, Toronto, ON M5G 2L

About this event

The Ontario Environment and Cleantech Business Forum will bring together investment and business leaders, executives from Ontario's growing environment and cleantech sector, and senior government policy makers to share information, discuss common challenges and share opportunities for investment and growth. The day will include a mix of speakers, panels, networking sessions and dynamic, off-the-record roundtables with senior government policymakers.

Who will attend (and why)?

- **Ontario's leading environment and cleantech firms** will attend to share their stories, connect with investors and financial service providers, discuss their challenges with government policy makers and network with each other.
- **Ontario's investment and financial community** will attend to learn about opportunities in one of the fastest growing segments of the Ontario economy, meeting companies with rapidly expanding international and domestic markets with world-leading technologies and services and sharing their experiences.
- **Senior government policymakers** will attend to meet directly with industry, hear firsthand about growth challenges, and receive feedback on emerging policy and regulatory ideas.

Goals of the event

Building on the sold-out success of last year's event, our goals are to:

- bring a broader network of "enablers" of the environment and cleantech industry together (investors, clients, regulators, broader range of companies);
- attract new members and demonstrate value to existing members;
- generate revenue; and,
- discuss and make progress on the business barriers and strengths of our sector.
