

Introducing Ontario's leading water companies: ONEIA's water caucus

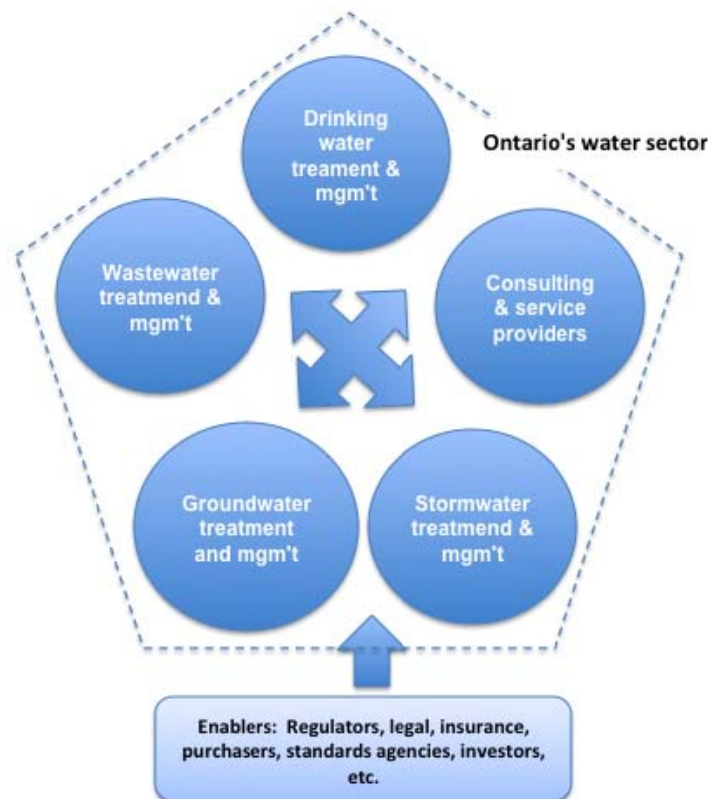

Ontario is a world leader in companies that provide water, wastewater and stormwater solutions. Whether it is cutting edge technology to purify drinking water, applications for wastewater and stormwater treatment and management or a range of service firms that design and implement the systems of tomorrow, Ontario companies are on the forefront of meeting this global need.

The Ontario Environment Industry Association (ONEIA) is the business association for our province's environment and cleantech firms. Our network of thousands of contacts includes key people at environmental technology, product and service companies, law, investment and insurance firms, institutes, universities and governments. Through their innovation and experience in Ontario and around the world, Ontario's environment industry provides market-driven solutions for society's most pressing environmental problems.

About Ontario's water sector

Ontario is home to the majority of Canada's environment and cleantech firms – and a critical mass of its water and wastewater companies. ONEIA's model shows five (5) interrelated portions of this dynamic sector:

- **Drinking water treatment firms** represent the most visible portion of this sector, offering standard and new technologies to purify and manage potable water for personal and industrial use.
- **Wastewater treatment firms** focus on the other end of the pipe, offering technologies and approaches that deal with sewage, industrial wastewater and other liquid waste processes.
- **Stormwater treatment firms** focus on technologies that manage runoff improve the quality of stormwater by removing debris and pollutants and contaminants prior to discharge.
- **Groundwater firms** can often be found dealing with contaminated sites and other issues related to natural water tables.
- **Consulting and service firms**, for their part, offer a range of design, analysis and other services related to the four sub-sectors above, often working collaboratively on their projects.

About ONEIA's water caucus

ONEIA's water caucus is made up of the province's leading firms drawn from these five areas. These firms, through their stewardship of ONEIA's water subcommittee, actively engage in policy discussions with the province and meet regularly to discuss issues of mutual concern.

Water companies within the ONEIA membership

The following list notes a selection of companies within the ONEIA membership that work in one of the five areas outlined in our model of the Ontario water sector.

Adventus provides patented products and technologies designed to treat impacted soils, sediments, and groundwater In-Situ. Compounds treated include chlorinated solvents, pesticides, energetics, heavy metals, and petroleum hydrocarbons.

Our business model supports site owners, engineers, and consulting professionals by providing unbiased design and selection of the most cost-effective remediation strategies.

AGAT Laboratories provides expert analysis for environmental applications such as organic chemical analysis of water, groundwater, wastewater, soil, sediment sludge and solid waste.

www.agatlabs.com

ALS Laboratory Group is a global environmental testing company with 54 laboratories in 23 countries. Our Waterloo, ON laboratory is CALA accredited, state of the art, specializing in analysis of: remediation samples (O.Reg. 153/04 soils and waters), influent/effluent, air, drinking water and emerging organic pollutants.

ALTECH Technology System Inc., part of The ALTECH Group, design/builds patented air pollution control and wastewater treatment solutions. Technologies offered include System REITHER™, System Bayer REITHER™, and System HydroKleen™. www.altech-group.com

AMEC Earth & Environmental has more than 200 offices in North America, delivering industry-leading standards of excellence in Environmental Consulting, Geotechnical Engineering, Water Resources, Brownfield Redevelopment, and Sustainability Programs regardless of project size or complexity. www.amec.com

C3 Environmental Limited is an environmental engineering and contracting firm with extensive construction experience and exclusive Canadian license for products such as Waterloo Barrier groundwater containment as well as iSOC and CleanOX bio-remediation technologies.

c3group.com/c3environmental

Event Water Solutions Inc. provides water services to events that allows for the elimination of plastic water bottles. Organizations faced with the dilemma of large numbers of people attracted to their event requiring hydration and the environmental consequence/impact of the use of plastic water bottles for their hydration.

www.eventwatersolutions.com

Filter Innovations Inc. provides clients with simple, innovative, and proven solutions for the treatment of organic and inorganic materials in air and in groundwater, process water and domestic wastewater using its extensive manufacturing capabilities and control Telemetry systems. In addition to our standard solutions we provide engineered systems including Ultra Filtration, Chemical Treatment, Membrane Bio-Reactor, and Media Air scrubbers.

www.filterinnovations.com

Golder Associates Ltd.

Golder Associates is an employee-owned, global company specializing in ground engineering and environmental services. From offices worldwide, our employees work with clients who want to manage their environmental and engineering activities in a technically sound, economically viable and socially responsible manner.

www.golder.com

Green Turtle is a leading North American manufacturer and developer of commercial and industrial wastewater pretreatment technologies for fats, oil and grease removal, hydrocarbon removal. Green

Turtle's high performing interceptors are flexible, easy to install and maintain and come with industry leading warranties.

Imbrium Systems

Inc. designs, develops and manufactures stormwater quality treatment products to protect water resources from harmful pollutants. By developing technologies to address the long-term impact of urban runoff, Imbrium ensures its clients are compliant with government water quality regulations.

www.imbriumsystems.com

Maple Reinders is a renowned Design Build Environmental Constructor and has built up a strong record in the water and wastewater sector and in waste management (composting facilities) by applying highly advanced water and waste treatment technology systems serving both the municipal and industrial sector.

www.maple.ca

Maxxam Analytics Inc. With its customer-centric focus and commitment, Maxxam Analytics establishes itself as a national leader in environmental analysis and scientific expertise: a firm driven by service and science.

www.maxxam.ca

Monteco has a 20-year track record of successfully launching and operating Clean Technology businesses in air, water and energy markets. They

acquire environmental technologies that are ready for development and commercialization, matching the best management and financial capital with new technology capital. Monteco's companies include Imbrium®, Green Turtle®, Filamat® Composites, Optomem™ Sensors, Imtext™ Membranes and the founder of Biox.

www.monteco.com

Newalta provides cost-effective solutions to industrial customers to improve their environmental performance with a focus on recycling and recovery of products from industrial residues. We push beyond conventional thinking about waste, finding solutions that transform it into new products that will contribute to our customer's bottom line and reduce the environmental footprint.

Where by-product recovery isn't possible, we find ways to reduce the production of waste at the source. We partner with customers across many industry sectors in Ontario to manage and treat industrial wastewater, recovering valuable products such as oil to be recycled and removing contaminants, in order to return clean water to the natural environment.

www.newalta.com

Ontario Clean Water Agency is the partner of choice for more communities than any other water and wastewater service organization in Ontario - backed by a team of experienced professionals committed to high-quality performance and excellence. As a Crown Agency of the Province of Ontario, OCWA is committed to ensuring all Ontarians have access to a provider of safe and reliable water and wastewater services. While we pride ourselves on efficient and effective service, we also believe in the importance of trust and accountability. Meeting your specific water and wastewater needs - everything from operations and maintenance, to support services, training and emergency response.

www.ocwa.com

Ontario Ground Water Association (OGWA) is dedicated to protecting and promoting Ontario's most precious resource. The OGWA facilitates the various sectors of the ground water industry coming together for the delivery of safe and clean water supplies.

www.ogwa.ca

Ontario Sewer and Watermain Construction Association (OSWCA) has 750 member businesses that have built our municipal water infrastructure. Clean water is vital and we will need to continue current investments of close to \$2 billion annually.

www.oswca.org

Ontario Waterpower Association's mission is to be the collective voice advocating for the Ontario waterpower industry to ensure its sustainable development. We build strategic relationships with stakeholders, First Nations and government.

www.owa.ca

Pinchin Environmental Ltd. provides Engineering, Consulting, Project Management and Training services in the following areas: Air & Noise, Climate Change GHG, Occupational Health & Safety, Building Science, Environmental Assessment & Transactional Due Diligence, Indoor Air Quality & Microbial Contamination, Hazardous Materials (Asbestos, Mould, Lead), and Environmental Laboratory Services.

www.pinchin.com

Pollutech Group of Companies has been providing specialized professional environmental consulting services for over 40 years to our industrial, commercial, and government clients, relative to air, water, wastewater, and soil management issues. With aquatic and soil toxicity testing facilities in Point Edward, and air, water, and wastewater process testing facilities in Oakville, Pollutech is well suited to provide solutions for a variety of complex environmental issues.

www.pollutechgroup.com

Purifics ES Inc. is an experienced industry leader in Chemical Free Multi Barrier Water Purification: A licensed Engineering firm offering unique solutions that purify condition & control water to achieve economic and environmental advantage.

www.purifics.com

Rice Earth Sciences is a one-stop shop for groundwater, surface water and soils professionals. We have a complete product line consisting of well installation materials, sampling and monitoring equipment, geotechnical instrumentation and remediation solutions.

www.riceeng.com

Trojan Technologies is committed to reducing water stress and maximizing this invaluable resource for current and future generations. The continued development of innovative, technology-based solutions will provide municipalities, industrial enterprises, and consumers with practical ways to solve their water-related and process problems in an environmentally responsible way.

www.trojanuv.com

Xogen Technologies Inc.

Xogen's technology has the potential to revolutionize the approach to wastewater treatment by vastly reducing the footprint of treatment plants, and simultaneously producing a byproduct, hydrogen oxygen gas, for reuse.
